Period fo	The MAILING DATE of this commun or Reply	ication appear	s on the cover sheet	with the correspondence a	ddress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/16/2009 has been entered.

Status of the Claims

2. Claim 5 has been amended and Claims 9 and 10 have been added by Applicant in correspondence filed on 03/16/2009. Claims 5, 9, and 10 are currently pending. This is the first Office Action on the merits of the claim(s) following a request for continued examination.

RESPONSE TO ARGUMENTS

3. Claim 5 was rejected under 35 U.S.C. 103(a) as being unpatentable over Haro, et al. (Spine, 1997) in view of Haro, et al. (Journal of Spinal Disorders, 1999). Applicant traversed this rejection on the grounds that administration of MMP-7 yielded unexpectedly superior resorption of herniated discs when compared to administration of MMP-3 in an *in vitro* model. Examiner has found Applicant's arguments persuasive and the rejection of Claim 5 over Haro, et al., in view of Haro, et al., is withdrawn in light of the amendment to Claim 5.

Art Unit: 1617

4. Amended Claim 5 and newly added Claims 9 and 10 are examined on their merits below.

Claim Rejections - 35 USC § 102

- 5. The text of Title 35, U.S.C. § 102(b) can be found in a prior Office action.
- 6. Claims 5 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Haro, et al. (Journal of Clinical Investigation, 2000, provided in IDS).
- 7. Amended Claim 5 is drawn to a method of treating a herniated disc or herniated nucleus pulposus (HNP) characterized by directly administering an active ingredient comprising MMP-7 in the absence of exogenous MMP-3 to the affected site of the herniated disc or HNP. Newly added Claim 9 is drawn to a method of treating a herniated disc or HNP consisting essentially of administration of MMP-7 to the affected site of the herniated disc or HNP.
- 8. Haro, et al., teach that addition of macrophages from MMP-3 null mice to wt intervertebral discs resulted in a $55.2 \pm 2.1\%$ reduction in wet weight of the intervertebral discs (Fig 1; pg 145, col 1, para 3, lines 19-21). It is noted that macrophages from MMP-3 null mice do not produce MMP-3, but are capable of producing MMP-7. Thus, the presence of macrophages from MMP-3 null mice is tantamount to administration of MMP-7 in the absence of MMP-3. Therefore, Haro, et al., anticipates all the limitations of the rejected claims.

Claim Rejections - 35 USC § 103

- 9. The text of Title 35, U.S.C. § 103 can be found in a prior Office action.
- 10. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Haro, et al. (Journal of Clinical Investigation, above).

Art Unit: 1617

11. Newly added Claim 10 is drawn to a method of treating a herniated disc or HNP consisting of administration of MMP-7 to the affected site of the herniated disc or HNP.

- 12. Haro, et al., teach that addition of macrophages from MMP-3 null mice to wt intervertebral discs resulted in a 55.2 ± 2.1% reduction in wet weight of the intervertebral discs (Fig 1; pg 145, col 1, para 3, lines 19-21). It is noted that macrophages from MMP-3 null mice do not produce MMP-3, but are capable of producing MMP-7. "Consisting of administering MMP-7" is closed language indicating that only MMP-7 (e.g. not cells that produce MMP-7) is administered. Haro, et al., does not teach a method of administering only MMP-7.
- 13. However, Haro, et al., explicitly teaches the importance of MMP-7 in the process of disc resorption. "Macrophage-derived MMP-7, but not MMP-3, was required for disc resorption and macrophage invasion of disc tissue" (pg 148, col 1, para 2, lines 1-3). Given that the presence of MMP-3 deficient macrophages, which consists essentially of MMP-7, significantly enhances resorption, it would have been *prima facie* obvious to one of ordinary skill in the art to administer MMP-7 to the site of a herniated disc or NHP.

Conclusion

- 14. Claims 5, 9, and 10 are rejected.
- 15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Zarek whose telephone number is (571) 270-5754. The examiner can normally be reached on Monday-Thursday, 7:30-5:00.

Art Unit: 1617

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan can be reached on (571) 272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
